Organized by

**Directorate of Continuing Education (DCE)
Bangladesh University of Engineering and
Technology (BUET)**

Dhaka-1000

In the rapidly evolving landscape of the global construction industry, the pillars of Quality, Safety, and Management have become more critical than ever. Ensuring the structural integrity of foundations and reinforced concrete (RCC), adhering to stringent safety guidelines, and implementing efficient management practices are essential for the successful and sustainable delivery of any infrastructure project. This intensive short course, organized by the Directorate of Continuing Education (DCE), BUET, is designed to provide professionals with the technical knowledge and practical insights required to excel in these domains. Over the course of two days, participants will engage with renowned experts from the Department of Civil Engineering, BUET

By bridging the gap between academic excellence and industry practice, this program aims to empower engineers, project managers, and construction professionals with the tools necessary to uphold the highest standards of excellence in the built environment. We welcome you to this collaborative learning experience at BUET, where we strive to build a safer and more resilient future together.

WHO SHOULD ATTEND?

This short course is designed for anyone involved in Construction Management and Quality Management in construction projects. The following participants will get the most benefit from attending this short course:

- Construction Project Manager
- Construction Site Supervisor/ Engineer
- Civil Engineer
- Entrepreneurs, CEOs of small, medium, and large organizations
- Level 4 or 4th-year student of bachelor's in civil Engineering
